Anush Serrao

Full Stack Developer & AI/ML Enthusiast

Email: anushserrao7@gmail.com | **GitHub:** ashserrao | **Portfolio:** ashserrao |

LinkedIn: ashserrao

Summary

Full-Stack Technologist & AI/ML Enthusiast who engineered a ReactJS Chrome Extension that reduced unauthorized access by 95% and built an Angular TS application capable of processing over 2 million student records annually. Proven ability to integrate AI monitoring (TensorFlow.js) and leverage advanced analytics (Tableau, Power BI) for high-impact, scalable application development.

Education

- **M.Sc. in Computing (Major: Artificial Intelligence)** **Sep 2025 – Present**
  | Dublin City University
- **Master of Computer Applications (Major: Full-Stack Development)** **Sep 2021 – Sep 2023**
  Jain University
- **Bachelor of Computer Applications** **Aug 2017 – Sep 2020**
  | St. Francis De Sales College
  Relevant Coursework: Advanced Algorithms, Data Structures, Database Systems, and Software Engineering Principles.

Skills Summary

- Full Stack Frameworks: Django, Angular TS, ReactJS, NodeJS, Google Chrome Extension API.
- Programming Languages: JavaScript, Typescript, Python, Java.
- Machine Learning: NumPy, Pandas
- Databases: PostgreSQL, MongoDB, SQLite
- Data Tools: MS Excel, Git

Experience

ASSOCIATE SOFTWARE DEVELOPER **Jul 2023 – Aug 2025**

| Examroom.AI

- Built a highly scalable, multi-console exam conducting web application using **Angular TS (micro-frontend architecture)** that processed data for 2,000,000+ student records annually.
- Integrated AI monitoring capabilities into the application using **TensorFlow.js** to enhance candidate proctoring and detection of anomalous behavior.
- Developed a **ReactJS/webpack**-based **Google Chrome Extension** that optimized exam security and reduced unauthorized access attempts by 95%.
- Maintained project velocity and code integrity by participating in all Agile sprints and performing rigorous peer code reviews.

QUALITY ANALYST FOR OPERATIONS **Dec 2021 – Jul 2023**

| Examroom.AI

- Executed comprehensive quality assurance (QA) processes for critical operational workflows, analyzing large datasets for discrepancies using **MS Excel** and **Google Spreadsheets**.
- Streamlined data reporting by developing visual metrics and insights using **Power BI**, which improved weekly reporting efficiency and data clarity by 70%.
- Automated repetitive data preparation tasks and workflow triggers using **Power Automate**, increasing operational throughput and data integrity.
- Identified, documented, and tracked over 500+ defects, collaborating directly with the responsible team and mentoring new analysts on QA protocols.

CUSTOMER SUPPORT EXECUTIVE **Jun 2021 – Nov 2021**

| Examroom.AI

- Provided first-line technical support, resolving complex customer issues quickly and efficiently, maintaining a 95% satisfaction rate.
- Utilized strong problem-solving skills to diagnose and escalate critical software and operational issues to senior teams.

Personal Projects

Secure E-banking Backend Development (Spring Boot/SQL) Github Link

- Developed a scalable, secure e-banking backend using Spring Boot and SQL for robust data handling.
- Designed RESTful APIs for user authentication and implemented Role-Based Access Control for Admin/Customer privileges.

Real-Time Weather Application (JavaScript/OpenWeather API) Github Link

- Created a location-specific weather application (JavaScript/HTML5/CSS3) to display real-time data.
- Integrated the OpenWeather API to fetch and display real-time meteorological data (temperature, humidity, wind speed).

Targeted Web Scraping Tool (Python/Scrapy) Github Link

- Developed a specialized web crawling tool using Python and the Scrapy framework to extract structured book data (titles, prices, availability).
- Utilized Scrapy features (Rule/LinkExtractor) to automate dynamic link extraction and categorical crawling.

Accomplishments and Awards

- **Drove product design** as the Product Owner for a new **ReactJS/webpack-based Google Chrome Extension** designed to secure online assessments, resulting in a **95% optimization** that eliminated malpractice and unauthorized access.
- Earned the **Six Sigma White Belt Certification** from the **AIGPE Board**, demonstrating proficiency in core process improvement methodologies and commitment to quality principles.
- Awarded the **Microsoft Certified: Python Programmer** certification, validating proficiency in writing Python code for software development.
